Past Performance Examples

Since 2001, edo consulting's seasoned resources have held a large number of project roles for Fortune 500 and Federal Customers.

The following are *just a few* Past Performance Role Examples:

Enterprise Solution Architect for Demand & Supply Planning at a Fortune 100 international manufacturer: defined AS-IS and To-Be Business Requirements; configured and aligned software applications to business requirements; trained resources; optimized processes; created actionable metrics and reports.

Solution Architect for JDA Fulfillment at a large national retailer providing leadership, direction and support to on-site resources; determined requirements and gap analysis; created Fulfillment solution design to support business objectives; executed testing, delivery and implementation support; provided post-implementation support to planners, managers and executives.

SAS Certified Technical Analysts provided metrics and reporting expertise at a large Government Agency. Responsible for forward thinking strategies and initiatives. Developed a comprehensive and flexible analytics platform to meet business requirements.

Project Manager for a complex supply chain technology implementation at a Fortune 500 apparel retailer. Developed and managed the overall project plan, budget, scope, issues and risk mitigation, milestones, deliverables, communications and the day-to-day activities of project team.

Subject Matter Expert in Supply Chain Management providing Post-Implementation support for an international manufacturer and distributor. Optimized and fine-tuned their system and processes; educated their team; re-aligned their metrics and reporting; provided comprehensive end user support.
